Quick Installation Guide

This instruction is for the quick installation of the **SAX24**. For detailed information please read the manual.

Assembly: The **SAX24** is not finally assembled, when delivered. This is to reduce volume of package and cost of transportation. To do final assembly, you have to use a screwdriver for recessed head screws. Follow the instruction shown on the pictures below.

Installation: The **SAX24** is to be assembled on the rear side of arcutronix 19"-chassis (e.g. SRX10). For installation, a screwdriver for recessed head screws has to be used. To do the installation (after final assembly), please see instructions below.
